

Test Case	Expected Result	Actual Result	Steps to Reproduce	Pass/Fail	Environment	Notes
Create new account for demoBlaze.com	New account should be created.	A new account was created, so long as the username and password hadn't been used before. An alert popped saying that account creation was successful, however, nothing changed on the page after. Only after logging in with the new account does the page display a greeting and the user's name.	Go to https://www.demoblaze.com/index.html > click Sign up > enter info for new account > click pop up window's sign up button > alert pops up confirming new account successful > click accept on alert > check top right of page	Pass	Firefox Windows 10 Pro	
Create new account but cancel instead of completing signing up	Should be able to cancel the sign up and the home page should not change.	Was able to enter new account info and cancel. The homescreen did not change and remained the default.		Pass	Firefox Windows 10 Pro	
Login with existing account	Login should be successful and username displayed on screen with greeting.	Was able to successfully login into account. Received a pop up alert confirming successful log in and the account username appeared on screen with a greeting.		Pass	Firefox Windows 10 Pro	
Login with nonexistent account	Login should be unsuccessful because there is no account existing under the username and password yet.	Unsuccessful login. Received a pop up alert saying the account does not exist.		Pass	Firefox Windows 10 Pro	
Logout of account	Should log user out of their account.	Was able to log out successfully. Username and welcome display disappeared and were replaced with the Sign up button again.		Pass	Firefox Windows 10 Pro	
Add two items to account	There should be the two items user selected in account.	Was able to add two items to the cart. Both items were the correct ones and the correct total cost was displayed.		Pass	Firefox Windows 10 Pro	
Delete two items from cart	The cart should have two items less.	Was able to delete two items from cart. Left over items remained.		Pass	Firefox Windows 10 Pro	You can go through the purchasing steps if the cart is empty, though it doesn't charge you any money. Unsure if that's a bug or intended.
Delete one item from two item cart	The cart should have one item in it after deletion.	Was able to delete one item from cart and the correct left over one in the cart, with the correct purchase total displayed.		Pass	Firefox Windows 10 Pro	
Add items to cart and then log in	The cart should still have the selected items inside.	The items that were in the cart disappear after logging in. They will reappear if user logs out of the account.	Go to https://www.demoblaze.com/index.html > add items to cart > go to cart > click log in button and enter information > click log in > get taken back to homepage > go to cart > cart will be empty	Fail	Firefox Windows 10 Pro	
Purchase items in cart	Items in cart should be purchased	Items in cart were purchased, but the date of purchase was wrong. Written as day/month/year, the date of purchase would show the incorrect month (For example, the purchase date for this test should have been 12/4/2023, but the website displayed 12/3/2023 indicating it was March not April.		Pass for purchasing Fail for correct display	Firefox Windows 10 Pro	
Copy link to cart with item/s (at minimum one item) and open link in different browser	Should open page to website's cart with user logged out and cart empty in other browser.	Opened page to cart section of website (tested with no user logged in and user logged in. If user is logged in original browser then they will not be when link is opened in new browser). The website then added an exponential amount of items to the shopping cart instead of being empty or holding the user's cart from the other browser. If you do this test without any items in the cart (no user logged in) then the new browser will still add an exponential amount of items to the cart.	copy demoBlaze's cart page link > enter link in new browser	Fail	Firefox to Microsoft Edge Windows 10 Pro
